

All-in-One RFID Reader

READFINITY CORE

Introducing the Next-Gen All-in-One RFID Reader engineered to elevate POS performance and extend far beyond traditional checkout environments.

Designed with optimized capabilities, enhanced security, and a compact form factor, this new platform delivers the flexibility and power required for modern retail operations. With backward compatibility and multiple integration options, it ensures a smooth transition for existing deployments while opening the door to new, advanced use cases.

RFID PERFORMANCE & SECURITY

Reliable, high-speed reading with built-in theft protection and secure communications.

INTEGRATION FLEXIBILITY

Easy integration with any pos, platform, and retail system.

BACKWARD COMPATIBILITY

Hardware and software backward compatibility with already deployed pos systems.

MORE THAN A READER

Beyond integrated RFID reading, its architecture enables multimedia processing, sensor and camera data capture, and unlocks future potential for local Edge AI.

Product description:

READFINITY RC110, CORE 4 PORT*

READFINITY RC120, CORE 8 PORT*

READFINITY RC100 SERIES, GPIO HUB

STRAIN RELIEF ASSEMBLY (OPTIONAL)

PWR SPLY FOR RC100 12VDC 60W 5A**

CABLE, USB-A MALE USB-A MALE 1M DATA ONLY***

Part Numbers:

10039765

10039763

10039766

10039695

10040420

10041789

*Includes one strain relief assembly (10039695). Additional units may be required when multiple cables are connected.

**Required only when PoE+ is not used as the power source.

***Required if use casae require Keyboard emulation.
